Welcome to the seminar

Dear Sir/Madam

It is indeed a great pleasure to invite you to participate in the National Seminar "The Impact of digitalization of public services on society" to be organized by Faculty of science, Mahamaya Govt. Degree College, Mahona, Lucknow affiliated to University of Lucknow during 20-21 Jan, 2018 With the inception of information technology in India there is gradual revolution in the field of communication and delivering services to the people. Government is trying to bridge the gap between the digital haves and have not's by using technology for citizen. Mahamaya Govt. Degree College, Mahona came in existence in 26 Feb-2009 with aim to spread quality education to every youth coming to its campus. It is situated about 6 km from National Highway-24 Sitapur road on Itaunja-Kursi link road.

With regards

Dr. Susmita Chandra

About the seminar

India is the largest democracy and one of the oldest civilizations in the world. It has tremendous diversity across the nation. People of various religion, caste, creed and languages reside here. Nearly more than two third populations are living in rural India. The development of nation cannot be imagined in true sense of the term without delivering the national resources and opportunities to the poor and the under-privileged population so that they are uplifted. After independence our government keeps on planning various schemes to uplift the downtrodden but still the situation is far from satisfactory. Digital technologies are frequently used by us in day today lives in the field of retail stores and in government offices. It helps us connect with one another and also shares information on issues and concerns we confront. Digital India which has the potentiality as well as promise of transforming the entire nation along with

interface between the rulers and the ruled by injecting transparency at all levels of governance. India digitalized can help attain the goals of good governance and development. Numerous schemes which have been launched over the years since independence for alleviating poverty and unemployment are ubiquitously known for leakages they suffer from owing to lack of transparency at implementation level and also because of snail pace with which they are implemented to as a result of which millions in the country are still reeling under abject poverty and millions still jobless. The ultimate objective of digitalization is to deliver the government services to every citizen situated even in the remotest area in a transparent, reliable and affordable price. It can be achieved by making a person e-literate.

Themes/sub-themes/topics of the Seminar

- e-Governance: Reforming Government Through Technology
